

TOUGHGLASS

REFLECTIVE SPLASHBACK DISCLAIMER

22nd May 2023

Please Read Carefully Before Proceeding with Your Order

Please be advised that Reflect Silver is not a standard mirror and is intended for reflective purposes like a mirror. In addition, reflect Silver has a special coating applied, allowing us to toughen the glass to Grade A Safety Glass where standard mirrors cannot.

Due to a challenging manufacturing and processing sequence, we cannot deliver this product perfectly. We will do our best to prevent minor spots, slight water stains and scratches. However, it is essential to understand when reflective splashbacks are toughened; distortion can appear around the perimeter of the glass and around cut-outs on the finished product due to roller waves (processing involved when toughening the glass).

The product is slightly transparent (unlike our former product- Splashguard) and will require a painting service before using in a splashback application. Silicone will be visible on the product without painting service, and anything behind the mirror will not be completely concealed. Tough Glass are allowing "BLACK" paint as a standard unless otherwise specified upon quote/ order.

We proudly stand behind our warranty and industry-standard AS NZS 4667-2000 Quality requirements for cut-to-size and processed glass.

By placing an order with Tough Glass, you acknowledge and accept these standards and tolerances regarding reflective splashback glass.
